

Mike Corso, Sr. Vice President, Operations

Career Summary

With McCarthy since 2003

Education

*Bachelor's degree, Electrical Engineering,
Syracuse University*

Mike Corso has been with McCarthy since 2003 and has led the construction operations for over 4.9 Gigawatts of utility scale PV solar and over 340 MW of energy storage projects throughout the United States. As Sr. Vice President of Operations, Mike provides executive oversight for all renewable energy and storage projects nationally, ensuring project teams have adequate resources to manage safety, quality, schedule and construction efficiency solutions. He is committed to partnering with local communities on workforce development and has an established background in both union and non-union environments across the country.

Prior to joining McCarthy, Mike spent 8 years working with a national electrical contracting company where he managed electrical operations for various product types, ranging from transmission and distribution to water/wastewater, healthcare, detention facilities and commercial projects. In this role, Mike worked with several municipalities and federal agencies in the deployment of proprietary technology and custom instrumentation and controls.

Family and Community

Mike lives in Phoenix with his wife, two daughters, and son. He and his family are active members of McCarthy's Heart Hats community outreach program, which is dedicated to ensuring real community needs are being met through hands-on activities and financial support to a variety of nonprofit causes.
