

Jared Donald

As SVP, Head of USA for Amp Jared is responsible for the development and execution of Amp's business in the US from origination through to execution. Amp's business focuses on the development, construction and long-term operation of solar and storage assets across the country. In the US Amp's platform has brought more than 150MW of community solar projects to NTP over the last few years and is planning for another 400MW over the next two years. Of these projects DC-coupled energy storage has been designed into most sites with the first ones now operational and a total of 70MWh that will reach COD in 2021. The company's business has recently expanded to include utility scale solar and storage projects which will move into construction starting in 2022.

Prior to his time at Amp, Mr. Donald spent 10 years at Conergy where he was the Country Manager for Canada and part of the global leadership team. He is a professional engineer and holds an MBA in finance and strategy.
