

Eric Kim

Power Resources Planner

Eric supports and executes on behalf of SVCE for energy and capacity procurement. Additionally, he provides subject matter expert on energy storage systems and distributed energy resource (DER) integration. Most recently, Eric is leading the evaluation in the first of its kind Long Duration Storage Request for Offers (RFO) with a group of eight community-choice aggregators (CCA).

Prior to joining SVCE, Eric worked for the California ISO in various departments including New Resource Implementation, Renewable Integration, and Market and Infrastructure Policy. His focus since 2017 was on the integration of energy storage and DERs in the CAISO wholesale market. He was the policy lead for the Energy Storage and Distributed Energy Resources Initiative and introduced various new products and enhancements to one of the first wholesale markets integrating demand response and energy storage resources.
